NEMATOTOLOGY LITERATURE LIST

1972 - 1973

By Virginia Harrington^{1/}

This list records 1,450 publications reviewed by the Plant Nematology Laboratory (formerly Nematology Investigations) during calendar years 1972 and 1973. Fourteen headings divide the list according to subject matter. Each reference has been listed only once, under the category considered most appropriate.

Most citations were indexed from the original publications or reprints forwarded to us through the courtesy of the authors. Others were indexed from journals of abstracts, while a few were listed from the bibliographies and literature citations of published papers.
